

Environmental Disclosure Statement

Electricity can be generated from a number of different fuel sources, resulting in different emissions. CleanChoice Energy, Inc. will report fuel sources and emissions data twice annually, allowing customers to compare data with other suppliers in Maryland. CleanChoice Energy, Inc. offers 100% regional, renewable wind energy to our customers.

Sources of Electricity Supplied as of 09/30/18

Sources of Electricity	CleanChoice Energy ¹	PJM System Mix ²
Coal	0%	30%
Oil	0%	0.20%
Natural Gas	0%	30%
Nuclear	0%	35%
Other	0%	0.01%
Renewable Energy:		
Solar	1%	0.25%
Wind	99%	3%
Biomass	0%	0%
Captured Methane Gas	0%	0.31%
Water	0%	1%
Geothermal	0%	0%
Municipal Solid Waste	0%	0.50%
Renewable Energy Resources Subtotal	100%	5%
TOTAL	100%	100%

Air Emissions

lbs/MWh Nitrogen Oxides (NOx), Sulfur Dioxide (SO ₂), and Carbon Dioxide (CO ₂) emitted for the 12 months ending 9/30/18.		
	CleanChoice Energy	PJM System Mix
Carbon Dioxide	0 lbs	938 lbs
Nitrogen Oxides	0 lbs	0.57 lbs
Sulfur Dioxide	0 lbs	0.71 lbs
Carbon Dioxide (CO ₂) is a "greenhouse gas" which may contribute to global climate change. Sulfur Dioxide (SO ₂) and Nitrogen Oxides (NO _x) released into the atmosphere react to form acid rain. Nitrogen Oxides also react to form ground level ozone, an unhealthy component of "smog".		

¹CleanChoice Energy, Inc. provides a 100% renewable product procured from known resources comprised of regional wind energy. CleanChoice purchased and retired Renewable Energy Certificates (RECs) to offset the entirety of Maryland customers' energy usage for the 2018 calendar year.

²PJM System Mix data from October 2017 - September 2018. The sum of the individual fuel sources may not equal 100% due to rounding.
